Career objective

Detail-oriented and motivated Computer Science graduate with hands-on experience in manual SQA, UAT, regression testing, and API testing using Postman. Skilled at identifying bugs, documenting test results, and ensuring software meets strict business and user requirements. Passionate about delivering high-quality products and continuous learning within the Software Quality Assurance domain.

Technical Skills

- **Automation & Testing:** Postman (API Testing), Jira, Selenium WebDriver
- **Methodologies:** Agile/Scrum, SDLC, STLC, Regression Testing, Smoke Testing, UAT
- **Documentation:** Test plan, Test cases, bug reports
- **Languages & Web:** C++, Java, React
- **Databases:** MySQL, SQL Server, Oracle
- **Version Control & Tools:** Git, GitHub, MS Office

Work Experience

Intern – Software Team, ICT Division

Rupali Bank PLC, Dhaka

Oct 2023 – Dec 2023

- Gained practical understanding of **SDLC** and **STLC** processes and used this knowledge to design test cases that achieved 100% requirement coverage in banking application testing
- Identified and reported around **10+ critical** and high-priority bugs, helping improve software quality and reduce the risk of system failures.
- Documented test cases, executed **Regression** tests, and reported defects to the development team.

Projects

Car Rental Management System | Java, React

2025

- Wrote and executed **15+ test cases** covering critical functional requirements and user authentication scenarios
- Identified and reported **15+ bugs** during the manual testing phase, significantly improving application stability before final delivery
- Produced industry-standard QA documentation, including test plans and organized bug reports following **STLC** standards

Software Quality and Testing Course Project- Medi Track Pro | PHP, MySQL

2023

- Tested **RESTFul APIs** using **Postman** to validate status codes, request/response payloads, and data accuracy
- Verified **CRUD** operations for core system modules, ensuring seamless data flow between the frontend and backend
- Utilized **SQL** queries to perform backend database validation and ensure data integrity across system records.

Education

Executive Master in Information Technology (EMIT) – *Institute of Information Technology, University of Dhaka*
Sept 2025 – Present

BSc in Computer Science & Engineering – *American International University-Bangladesh (AIUB)*

Jan 2020 – April 2024 · CGPA: 3.51/4.00

Relevant Coursework: Software Quality and Testing, Data Structures and Algorithms, Advanced Programming in Web Technology

Certifications

- Selenium WebDriver Java Basics + Advance Selenium Framework (Udemy)

Leadership & Volunteering

Club Member & Volunteer
AIUB Computer Club | 2021–2023

- Helped run technical workshops and coding seminars, supporting event promotion and managing basic logistics for students
- Worked with different club teams to plan events better and increase student participation through effective planning and outreach.

Coordinator, Cyber Gaming Fest
AIUB Cyber Gaming Fest 2022 | Nov 2022

- Managed event logistics and tournament setup for a large university festival, making sure everything ran smoothly for all participants.
- Handled technical setup and troubleshooting, fixing hardware and internet issues quickly to keep the event on schedule
